

WonderWorx[®] LLC

WonderSwing

A truly ingenious and innovative interpretation of every kid's favorite playground fixture. The WonderSwing has an air compressor that converts the kinetic energy generated by the swinging action into airflow. The air is then regulated by a pressurized, closed system and flows down through a flute-like mechanism.

Various notes are created by manipulating the sound holes located on the right handhold. In fact, the pitch modulation elements of the WonderSwing have been engineered by one of America's foremost pipe-organ manufacturers.

The WonderSwing is an interactive piece of play equipment that is also a musical instrument. It combines fun with learning and provides many possibilities for demonstrating music or science concepts. Sample topics include wind instruments, pitch, timbre, hydraulics, compressors and more. Intuitive exploration, imaginative sensory play and uniquely beneficial, therapeutic applications add to the reasons why this invention is so inspiring and unique.

WonderSwing Information and Specifications

- One of a kind Musical Swing, US Patent Number 7,419,436 B2
- Swinging motion is harnessed to produce four musical notes
- Unique pivoting main beam drives a stainless steel and aluminum air compressor, pumping air through flute hand hold to generate sound
- Structure is crafted of durable, polyester powder coated steel and maintenance free high density, compression molded polyethylene
- Flute style right hand hold is ergonomically engineered for musical note play
- Seat is durable and comfortable rubber belting
- Age appropriate for children 5 to 12
- Designed for direct bury single swing posts
- Maximum fall height is 7' 8" – Install proper safety surfacing
- Use zone area is 19' 10 ½" wide x 30' 8" deep
- Unit measures 7' 5 ½" wide x 9' 6" tall - Weighs 280 lbs.
- Requires on-site assembly
- Installation instructions and warranty text furnished upon request
- Follows IPEMA (International Play Equipment Manufacturers Association), ASTM, and CPSC guidelines
- Available in two Color Schemes:
Color Scheme I (yellow/blue/red)
Color Scheme II (green/tan/light blue)
